

# HOW TO USE GITHUB

Presented by Angela White

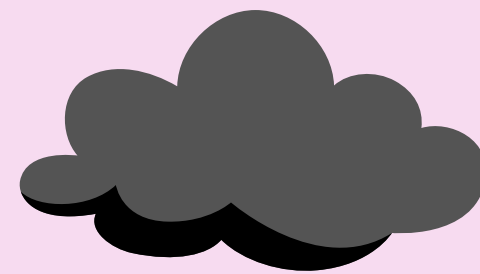

Explore **GitHub**

# what is GitHub

GitHub is designed as a  
Git repository hosting service.

you can share your code  
with others, giving them  
the power to make  
revisions.

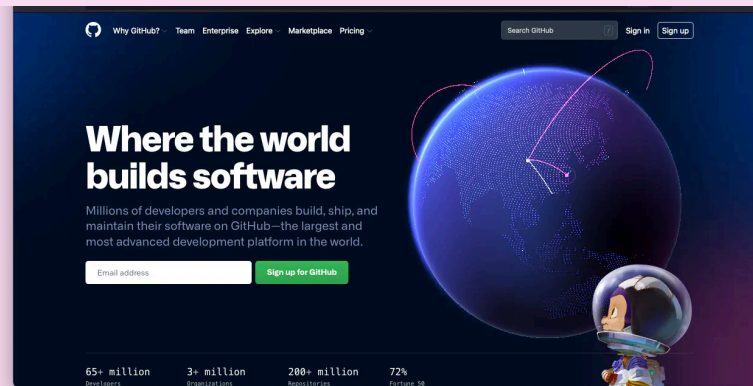

GitHub is  
exclusively  
cloud-based.

# Process

1

log in to GitHub

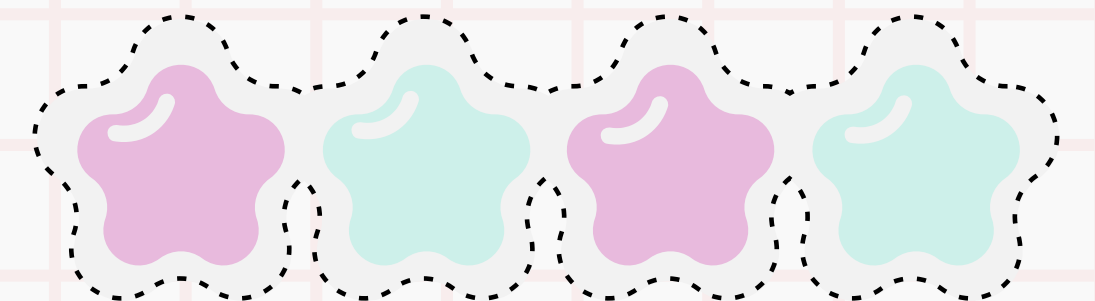

2

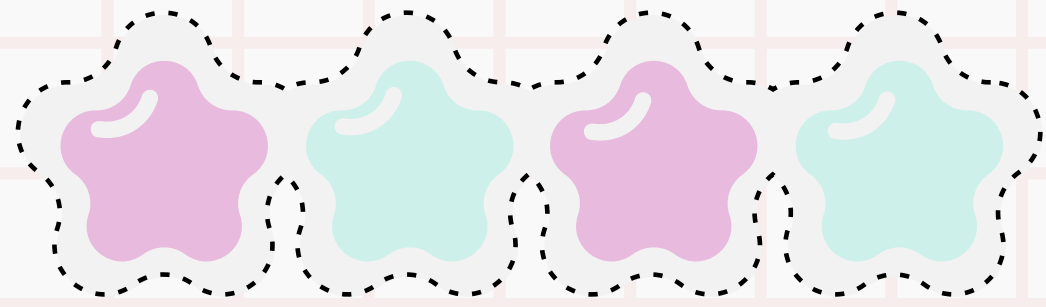

press sign in

3

pon nombres formales  
no pongas como:  
unicornio123  
cachorroagugu  
lalalilo  
laña  
etc...

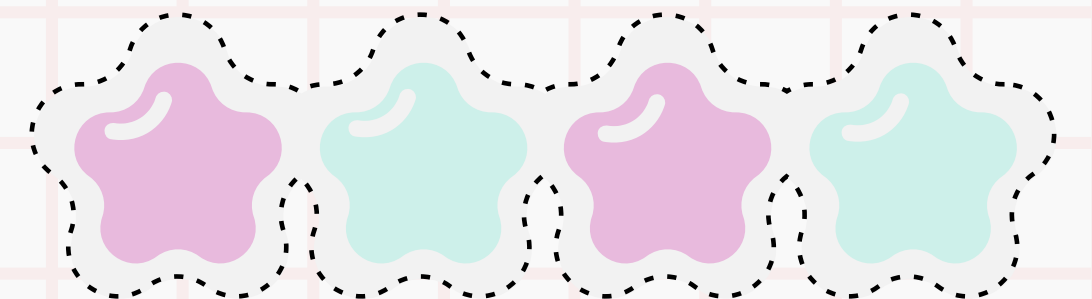

# Process p2

4

pon un contraseña  
cualquiera como:  
unicornio123  
cachorroagugu  
lalalilo  
laña  
etc...

5

cuando estrs adentro pon  
qualquier pfoto

# GitHub's story

GitHub is a code hosting platform that was founded by Tom Preston-Werner, Chris Wanstrath, and PJ Hyett in 2008 when they collaborated on a fun weekend project. Soon they realized that their weekend project had the potential to be something bigger.

Thank  
you
